What is Palliative Care?

Palliative care is a medical specialty dedicated to helping people with a variety of serious illnesses find a better quality of life. A palliative care professional works with you, your loved ones and your physician to create a plan of care that offers relief from pain, symptoms and stress. They explain your choices and ensure your needs and wishes are honored.

Community Palliative ConsultantsSM focuses not just on relieving physical pain and symptoms. Our team members also can help you with challenges that include: important decision-making, establishing goals of care, emotional and spiritual issues and family dynamics.

How Can Palliative Care Help?

People at any age with serious, complex or life-threatening illnesses may benefit from palliative care.

Community Palliative ConsultantsSM can help at any stage of an illness, as well as during curative treatment. We:

- Address physical symptoms such as:
 - pain, anxiety, fatigue, shortness of breath, constipation, nausea, loss of appetite, agitation, trouble sleeping
- Help you and your loved ones understand the illness you're facing and your treatment options
- Provide the tools, education and coordination of services that help you to carry on with your daily life
- Provide spiritual guidance and arrange for counseling and support to help you and your loved ones cope with the illness
- Assist you and your loved ones with making important choices, such as advance care planning, that respect your goals and values

How Do I Get Palliative Care?

Your physician can request a consultation for palliative care. Our Community Palliative ConsultantsSM professionals, which include specially trained physicians and advanced practice registered nurses, will meet with you and your loved ones to help you make important choices about your care. They then work with your physician to develop the best possible treatment plan.

Medicare and private insurance cover the cost of palliative consultations. A co-payment may apply.

If you feel that a palliative care consultation may benefit you or a loved one, please ask your physician. To speak directly with Community Palliative ConsultantsSM, please call **904.407.7700**, or visit **CommunityPalliative.com** to learn more.
